

## **Hoppe Industries Releases Audio Shade for Two-Seat Polaris® RZR® UTVs**

*Hoppe's Audio Shade UTV Hard Top Now Available for More Models to Meet Customer Demand.*

TROUP, September 6, 2019—Hoppe Industries, off-road and motorcycle accessory manufacturer, announced the release of a new addition to its Audio Shade UTV hard top product line: the Hoppe Audio Shade for Two-Seat Polaris® RZR® models.

This announcement comes five months after the company's initial release of the Audio Shade for Four-Seat Polaris® RZR® models.

"After the first Audio Shade for the four-seat RZR®, our dealers were more than enthusiastic for a two-seat version," explained Hoppe's J.D. Vey.

The new Audio Shade features the same Kicker® audio packages and Hoppe build quality as the first Audio Shade released in April but has been designed to fit the more compact two-seat RZR® model. Customers now have a choice between a four- or six-speaker package for this Audio Shade model, with subwoofer now standard across all Audio Shade models.

Vey encourages customers to experience both the audio and build quality features for themselves. "If you haven't heard one in person yet, you need to visit your nearest dealer and experience everything the Audio Shade has to offer."

Additionally, Hoppe is already developing more Audio Shade models for other popular UTVs in the market, with its next release slated for Q4. Vey added that any release news will be published on Hoppe's website and across social media, so customers should follow online to get the latest from the company.

The Hoppe Audio Shade for Two-Seat Polaris® RZR® models is now available for purchase through Hoppe, Authorized Motor Trike Dealers, and through both Drag Specialties and Parts Unlimited Dealers:
